

AMENDMENTS TO THE CLAIMS

1. **(Previously Presented)** A pharmaceutical composition having anti-inflammatory and analgesic property, comprising an alkylammonium salt of a 2-arylpropionic acid selected from the group consisting of ketoprofen, ibuprofen, naproxen or tiaprofenic acid, in racemic or enantiomeric form, in an aqueous solution at a pH in the range from 8 to 9, said solution being free of preservatives and co-solvents, wherein the composition is formulated for parenteral administration.

2. **(Currently Amended)** A The pharmaceutical composition of as claimed in claim 1, wherein said 2-arylpropionic acid is ~~containing~~ a L-lysine salt of ketoprofen.

3. **(Currently Amended)** A The pharmaceutical composition of as claimed in claim 2, further comprising ~~containing sodium bicarbonate and sodium hydroxide at pH 8.5.~~

4. **(New)** The pharmaceutical composition of claim 3, wherein the concentration of said sodium carbonate is 4 mg/ml.

5. **(New)** The pharmaceutical composition of claim 1, further comprising sodium hydroxide.

6. **(New)** The pharmaceutical composition of claim 1, wherein the concentration of said sodium hydroxide is 1.5 mg/ml.
